

Cyclistic Bike-Share Case Study

Data Analysis & Insights Report

YOSEF ADEL

July 2026

Introduction

- **Objective:** Understanding how annual members and casual riders use Cyclistic bikes differently.
- **The Goal:** Design marketing strategies to convert casual riders into annual members.

Data Process

Source: Cyclistic historical trip data (763,000+ records).

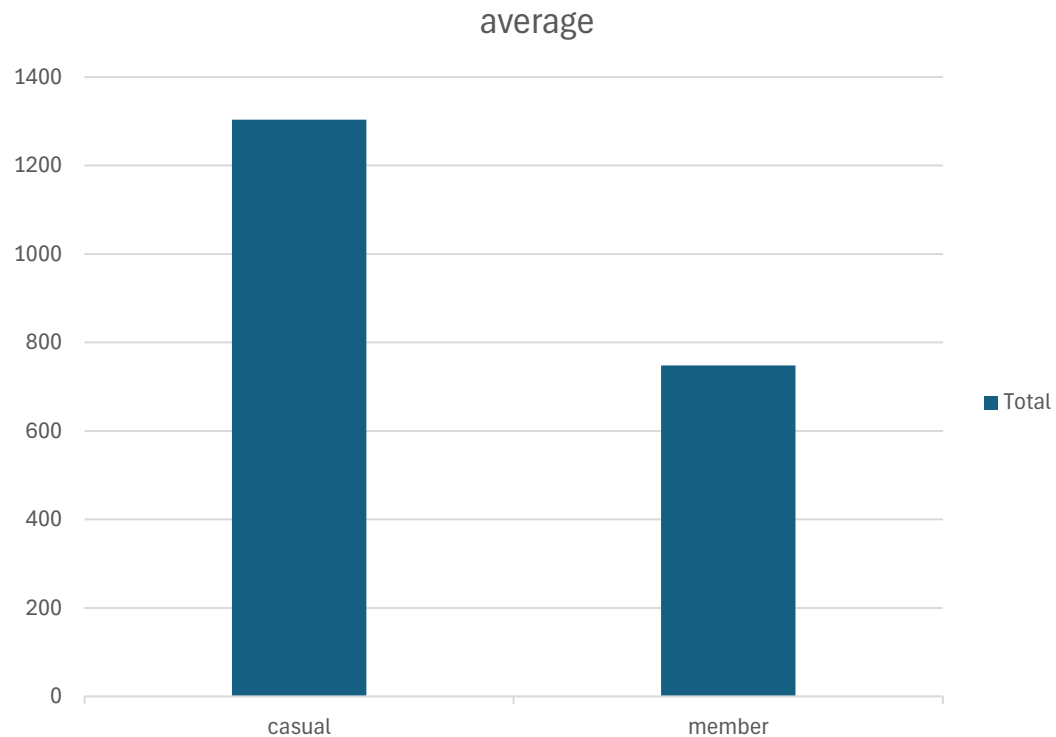

Process: Cleaned and manipulated data using SQL, and visualized insights using Excel.

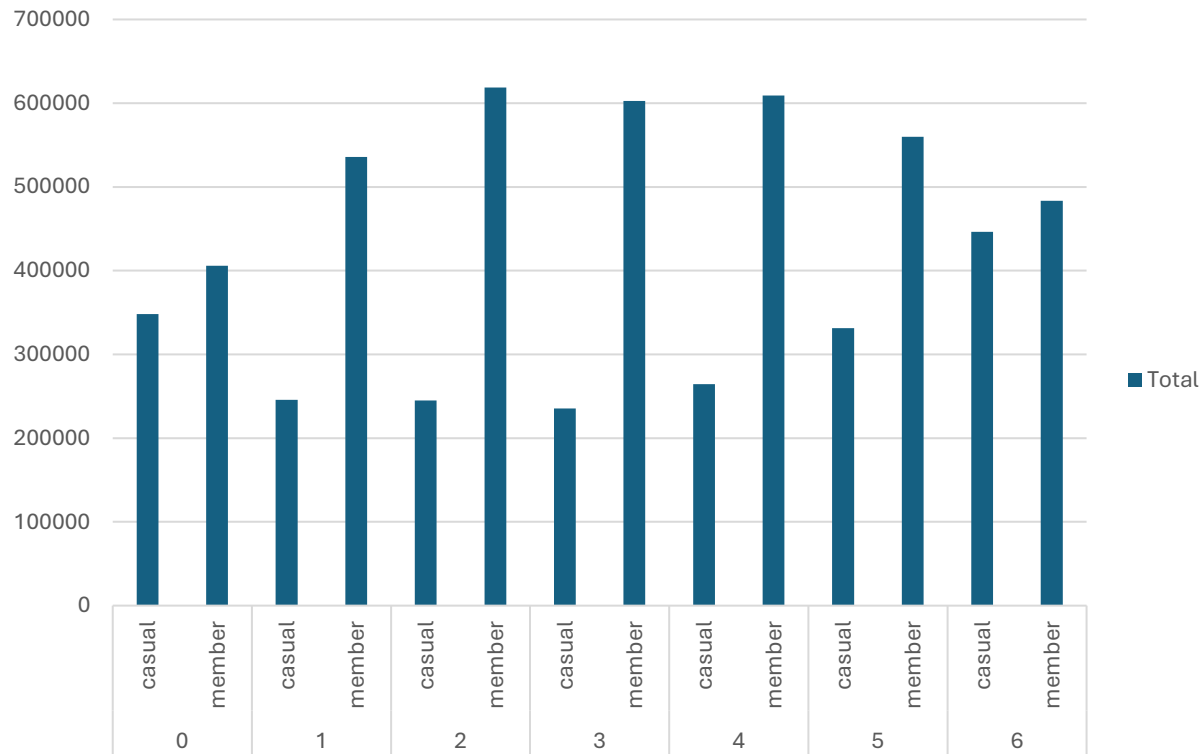

Key Action: Created calculated fields (ride_length, day_of_week) to enable deep analysis.

Key Insights

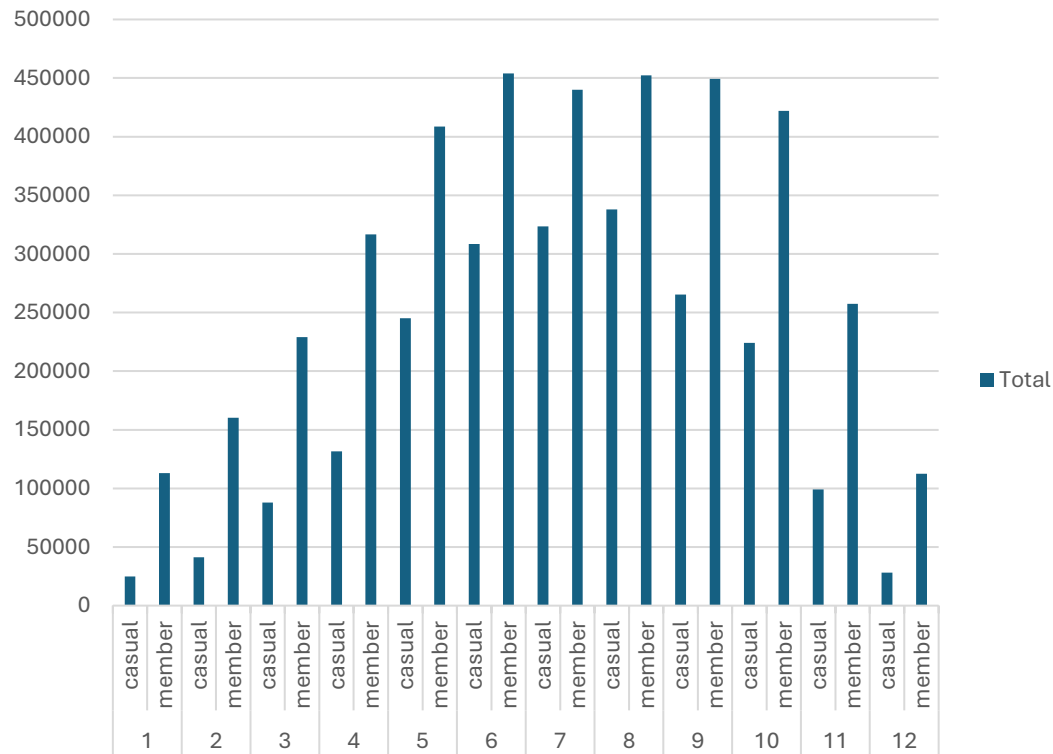

- **Ride Length:** Casual riders take significantly longer trips (average 1303s) compared to members (747s), indicating a leisure-oriented usage.

Key Insights

- **Weekly Trends:** Casual activity peaks on weekends, while member activity is stable throughout the week, confirming members use bikes for commuting.

Key Insights

- **Seasonality:** Casual usage drops significantly during winter months, while member usage remains consistent year-round.

Strategic Recommendations

- **Recommendation 1:** Launch a "Summer Membership Pass" targeting casual riders when their activity is at its peak (May–September)
- **Recommendation 2:** Introduce weekend-focused marketing campaigns to highlight the value of annual membership for frequent weekend riders.
